Motor Vehicle Accident (MVA) Notice
Agreement for Payment

The Financial responsibility for damages in motor vehicle accidents, which includes the cost of injury and treatment, rests primarily on the patient and not your health insurance. Compensation often takes months to obtain due to other adjudication process, and the payment is usually sent to the policy holders themselves, rather than the facility that provides the service to the injured parties. We will bill your insurance as a courtesy, you are ultimately responsible for payment.

In the case that Frisco ER fails to obtain payment directly from the responsible insurance company, you will be responsible for the bill. Frisco ER will make every effort to help you submit your claim for our medical services by providing the bill for your visit. Just as you would pay a mechanic to fix your vehicle, you would need to pay the medical services rendered when you receive compensation from the responsible insurance company.

By Signing below, you choose to give Frisco ER and its billing company the authority to directly contact and bill the involved insurances for services rendered on your behalf.

I **AGREE** to allow Frisco ER Billing Company to directly contact my insurance to obtain reimbursement for services rendered. If Frisco ER fails to obtain payment from my insurance, then I am solely responsible for the bill. **I am authorizing my insurance company to send payment to Frisco ER for services rendered.**

Motor Vehicle Accident Form

Authorization:

I authorize a lien in the amount of the submitted charges with be sent to the auto insurance with a copy of our claim. This lien is not against your or any of your property. The lien will help shift liability to the auto insurance and we will first seek payment from the policy. The purpose of the lien is to assure direct payment for the insurance company or any settlement to Frisco ER for the charges associated with your accident. We will limit your involvement in the billing process and can focus instead on your recovery.

Please provide a brief description of where and how the injury took place:
